Profile

Full stack web developer with a love for telling stories through tech. Experienced in Rails, JavaScript and React/Redux, with a background in songwriting and recording. My passions include discovering compelling stories in data, and using technology to enhance, rather than reduce, our humanity.

Technical Projects

mythOS - https://github.com/milesjamz/mythosfrontend

Innovative app that allows users to explore ancient Greek mythology and literature with maps and links - used Rails backend and React frontend, Google Maps API, JWT Auth with bcrypt.

BrewReview — https://github.com/milesjamz/mod4frontend

Comprehensive and searchable index of American breweries, allowing users to review products and create weighted averages - Used React with Rails backend.

BiblioTecha — https://github.com/milesjamz/bibliotecha

Allows users to populate their own visually illustrated personal library, either with a provided list of novels, or to add titles of their own - used vanilla Javascript with Rails backend.

Education

Flatiron School - Web Development, 2019
Hampshire College - Amherst, MA

Skills

Rails, JavaScript, React/Redux, JWT Auth and BCrypt, working with external APIs, D3 Data Visualization, HTML5, CSS3, git
